

The fast growth of the Insects Industry

EAAP has been delivering programs on animal science for over 70 years. After careful planning, we initiated to provide outstanding webinars by inviting top speakers who will introduce subjects related to animal science and livestock industry to scientists and technicians.

This webinar continues the plan to monthly inform, update, disseminate with high profile speakers the EAAP individual members.

The speakers are rigorously selected to offer exclusive inside on the topics. With the second EAAP Webinar we intend to update and inform about **the development of the insect sector** with a lecture offered by *Christophe Derrien*, from the “International Platform of Insects for Food and Feed” (Belgium),

and specifically on **the use of insects for animal feeding** with the speech by *Laura Gasco*, “Università degli Studi di Torino” (Italy). But also *Sergio Angeli*, from the “Libera Università di Bolzano” (Italy), will explain **the performance of black soldier flies**, likely the most interesting specie for the insects industry. **The health benefits by use of insect products in animal feed** will be described through the narration of *Aman Paul*, from “Protix” (the Netherlands), and finally, *Daniel Murta*, from “Entogreen” (Portugal), will satisfy interested participants by clarifying the **upscaling insect production and on overview of insect products applications**.

Attending EAAP Webinars, you will be able to stay on top of the latest research and gain new inspiration. Connect and network through a range of interactive presentations, discussions and workshops. Get updates on the latest results and opinion about animal science and livestock industry. You can use this program also to teach your students.

Useful information:

What: EAAP Webinar

Title: The fast growth of the Insects Industry

When: Wednesday, March 31st 2021, 13:15 - 16:45 Central European Time

Chair: Teun Veldkamp, Wageningen Livestock Research

How to participate: EAAP will send a [link](#) to all its members. The link will be disseminated through socials, EAAP Newsletters and website to allow participation also to interested non EAAP-individual members

More details on EAAP webinars and speakers will be soon available on the EAAP website.
